

the census

foundations of geospatial analysis

2026.09.21

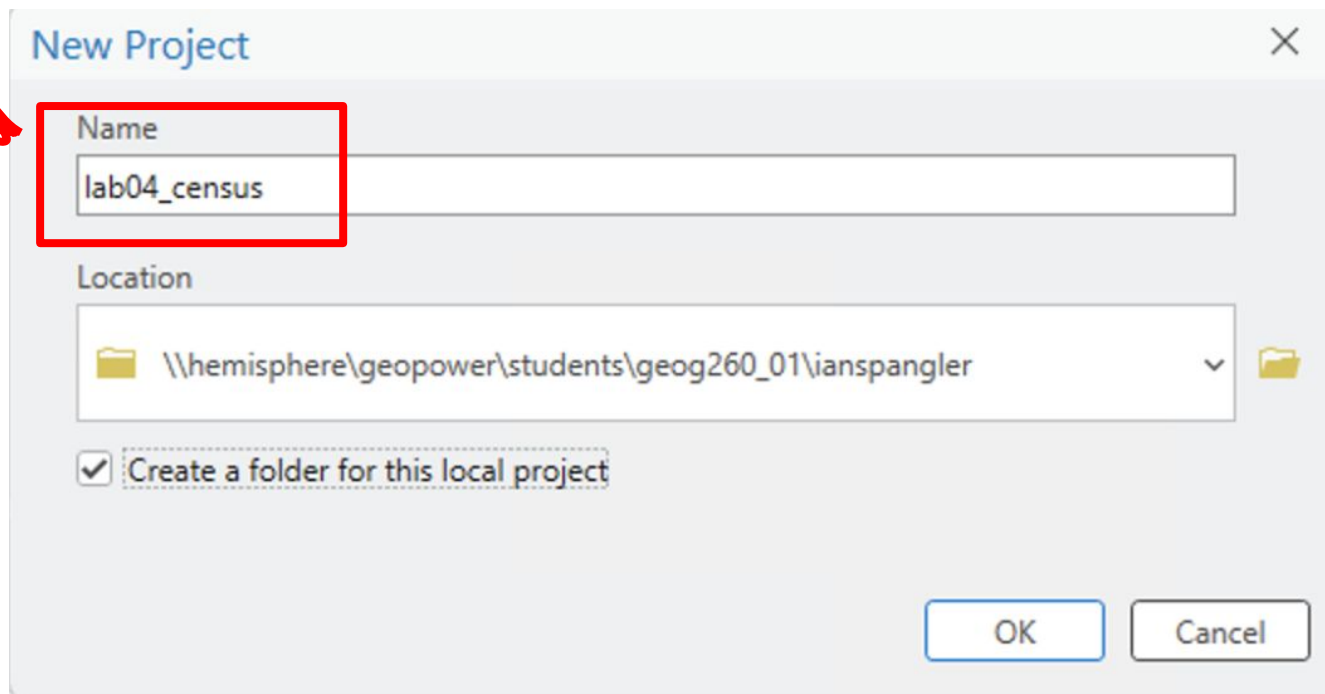

upcoming weeks

1. 9/28: vector analysis / exam review
2. 10/5: midterm exam
3. 10/7: ian at conference
4. 10/14: final project kickoff

**kudos on your file management/
file naming practices!**

**one quick tip for naming
projects:**

always rename this - it will become your .aprx filename

The image shows a 'New Project' dialog box. The 'Name' field is highlighted with a red rectangle, and a red arrow points to it from the text above. The 'Name' field contains the text 'lab04_census'. The 'Location' field shows a folder path: '\\hemisphere\geopower\students\geog260_01\ianspangler'. There is a checkbox labeled 'Create a folder for this local project' which is checked. At the bottom right are 'OK' and 'Cancel' buttons.

New Project

Name

lab04_census

Location

\\hemisphere\geopower\students\geog260_01\ianspangler

☒ Create a folder for this local project

OK Cancel

New Project

Name

lab04_census

Location

\\hemisphere\geopower\students\geog260_01\ianspangler

☒ Create a folder for this local project

OK Cancel

**you can leave this box checked
if you're pointing the new
project to your name**

New Project

Name

lab04_census

Location

\\hemisphere\geopower\students\geog260_01\ianspangler\lab04_census...

☐ Create a folder for this local project

OK Cancel

and you can *uncheck* it if you are pointing to an empty folder

New Project

Name

lab04_census

Location

\\hemisphere\geopower\students\geog260_01\ianspangler\lab04_census...

☐ Create a folder for this local project

OK Cancel

leaving it unchecked will create a new ArcGIS Pro project within the specified folder

New Project

Name

lab04_census

Location

\\hemisphere\geopower\students\geog260_01\ianspangler

☒ Create a folder for this local project

OK Cancel

checking it will create a new folder called "lab04_census" within "../ianspangler"

New Project

Name

lab04_census

Location

\\hemisphere\geopower\students\geog260_01\ianspangler

☒ Create a folder for this local project

OK Cancel

and *then* put the contents of
your new ArcGIS Pro project
inside "lab04_census"

**lastly, obligatory reminder that
sketch 01 is due tonight**

Requirements

Things your map must include

The following items are required for both maps you submit:

- A homemade basemap. For this assignment, you **may not** use a standard ArcGIS Pro basemap!
- A title
- A legend
- Some sort of inset map
- Accused witches by parish, sensibly represented for the client
- Some kind of “propogandistic” accompanying text
- Labels (at your discretion)
- A primary or secondary source (image, text, etc.) about the Scottish witch trials (HathiTrust and Internet Archive are good places to start)

Hierarchy of American Indian, Alaska Native, and Native Hawaiian Areas

major geographic entities in u.s. census

[this article](#) is a timeless explainer

block

census blocks, the smallest geographic area for which the Bureau of the Census collects and tabulates decennial census data, are formed by streets, roads, railroads, streams and other bodies of water, other visible physical and cultural features, and the legal boundaries shown on Census Bureau maps

[this article](#) is a timeless explainer

block group

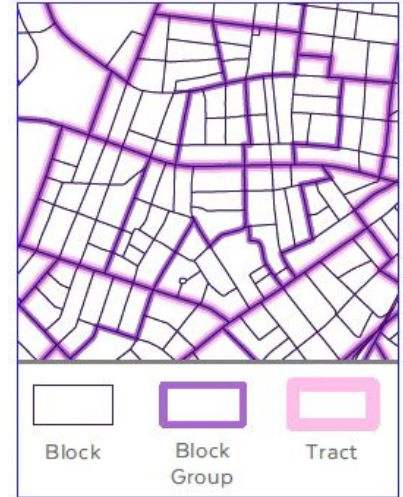

block groups (BGs) are the next level above census blocks in the geographic hierarchy. typically **600-3,000** people live here. a BG is a combination of census blocks and a subdivision of a census tract

[this article](#) is a timeless explainer

tract

census tracts are small, relatively permanent statistical subdivisions of a county. They're uniquely numbered in each county with a numeric code. Census tracts average about **4,000** inhabitants, with a minimum population of **1,200** and a maximum population of **8,000**

be decennial (*ten*
years) or surveys
(ACS)**

Start here OR go online at my2020census.gov to complete your 2020 Census questionnaire.

Use a blue or black pen.

Before you answer Question 1, count the people living in this house, apartment, or mobile home using our guidelines.

- Count all people, including babies, who live and sleep here most of the time.
- If no one lives and sleeps at this address most of the time, go online at my2020census.gov or call the number on page 8.

The census must also include people without a permanent place to live, so:

- If someone who does not have a permanent place to live is staying here on April 1, 2020, count that person.

The Census Bureau also conducts counts in institutions and other places, so:

- Do not count anyone living away from here, either at college or in the Armed Forces.
- Do not count anyone in a nursing home, jail, prison, detention facility, etc., on April 1, 2020.
- Leave these people off your questionnaire, even if they will return to live here after they leave college, the nursing home, the military, jail, etc. Otherwise, they may be counted twice.

1. How many people were living or staying in this house, apartment, or mobile home on April 1, 2020?

Number of people =

2. Were there any additional people staying here on April 1, 2020 that you did not include in Question 1?

Mark ☒ all that apply.

- ☐ Children, related or unrelated, such as newborn babies, grandchildren, or foster children
- ☐ Relatives, such as adult children, cousins, or in-laws
- ☐ Nonrelatives, such as roommates or live-in babysitters
- ☐ People staying here temporarily
- ☐ No additional people

3. Is this house, apartment, or mobile home — Mark ☒ ONE box.

- ☐ Owned by you or someone in this household with a mortgage or loan? *Include home equity loans.*
- ☐ Owned by you or someone in this household free and clear (without a mortgage or loan)?
- ☐ Rented?
- ☐ Occupied without payment of rent?

4. What is your telephone number?

We will only contact you if needed for official Census Bureau business.

Telephone Number

 - -

FORM **DI-Q1** (05-31-2019)

Person 1

5. Please provide information for each person living here. If there is someone living here who pays the rent or owns this residence, start by listing him or her as Person 1. If the owner or the person who pays the rent does not live here, start by listing any adult living here as Person 1.

What is Person 1's name? *Print name below.*

First Name

MI

Last Name(s)

6. What is Person 1's sex? Mark ☒ ONE box.

☐ Male ☐ Female

7. What is Person 1's age and what is Person 1's date of birth? *For babies less than 1 year old, do not write the age in months. Write 0 as the age.*

Age on April 1, 2020

years

Print numbers in boxes.

Month

Day

Year of birth

→ NOTE: Please answer BOTH Question 8 about Hispanic origin and Question 9 about race. For this census, Hispanic origins are not races.

9. What is Person 1's race?

Mark ☒ one or more boxes **AND** print origins.

☐ White – *Print, for example, German, Irish, English, Italian, Lebanese, Egyptian, etc.* ↗

☐ Black or African Am. – *Print, for example, African American, Jamaican, Haitian, Nigerian, Ethiopian, Somali, etc.* ↗

☐ American Indian or Alaska Native – *Print name of enrolled or principal tribe(s), for example, Navajo Nation, Blackfeet Tribe, Mayan, Aztec, Native Village of Barrow Inupiat Traditional Government, Nome Eskimo Community, etc.* ↗

☐ Chinese

☐ Filipino

☐ Asian Indian

☐ Other Asian –
Print, for example, Pakistani, Cambodian, Hmong, etc. ↗

☐ Vietnamese

☐ Korean

☐ Japanese

☐ Native Hawaiian

☐ Samoan

☐ Chamorro

☐ Other Pacific Islander –
Print, for example, Tongan, Fijian, Marshallese, etc. ↗

☐ Some other race – *Print race or origin.* ↗

Census Bureau stopped work on data for protecting trans rights, former director says

UPDATED FEBRUARY 21, 2025 · 7:34 PM ET ⓘ

Hansi Lo Wang

After President Trump put out an executive order targeting gender identity, the U.S. Census Bureau stopped work on producing statistics that could help protect the rights of transgender people, the bureau's [recently departed leader](#) tells NPR.

The bureau, which is the federal government's largest statistical agency, has taken steps to remove gender identity questions from at least four separate surveys it conducts.

They include the National Crime Victimization Survey and the National Health Interview Survey, Robert Santos tells NPR in his first published interview since resigning [last week](#). Brian Tsai, a spokesperson for the health survey's sponsoring agency, the National Center for Health Statistics, confirms in a statement to NPR that the change was made to comply with Trump's [Executive Order 14168](#). The [Times Union](#) of Albany, N.Y., first reported on a directive that went out to one of the bureau's regional offices about the crime survey's change.

Trump administration's data deletions set off 'a mad scramble,' researcher says

TECHNOLOGY

Tru
set
say

NEW YORK (AP) — Researchers are in what one described as “a mad scramble” to sort out what public data the Trump administration has deleted from government websites and electronic publications.

Late last week, federal agencies took down [scores of government webpages](#) as staffers hurried to comply with [President Donald Trump’s order](#) rolling back protections for transgender people, which required the removal of “[gender ideology](#)” language from websites, contracts and emails.

Some of the sites were back online Monday, but data analysts say it’s not clear exactly what was removed or changed.

“You go looking for something and it’s just not there,” said Amy O’Hara, a Georgetown University researcher who is president of the Association of Public Data Users.

Social science researchers and other federal data users on Monday described feeling like a five-alarm fire was triggered when they discovered late last week that vital federal datasets were inaccessible.

The public lost access to Census Bureau data for days after a Trump order

FEBRUARY 12, 2025 · 3:00 PM ET

Hansi Lo Wang

An apparent attempt by the U.S. Census Bureau to follow an executive order by President Trump targeting gender identity led to the public losing access for days to certain key statistics.

DONATE

Close to two weeks after users first noticed many parts of the bureau's website — like those of [other agencies](#) — had [gone dark](#), the federal government's largest statistical agency [has yet to make any public statement](#) about the disappearing data and research, at least some of which now appears to be restored.

How "data censorship" came to the Census Bureau

Before coming back, the bureau's homepage went offline on Jan. 31.

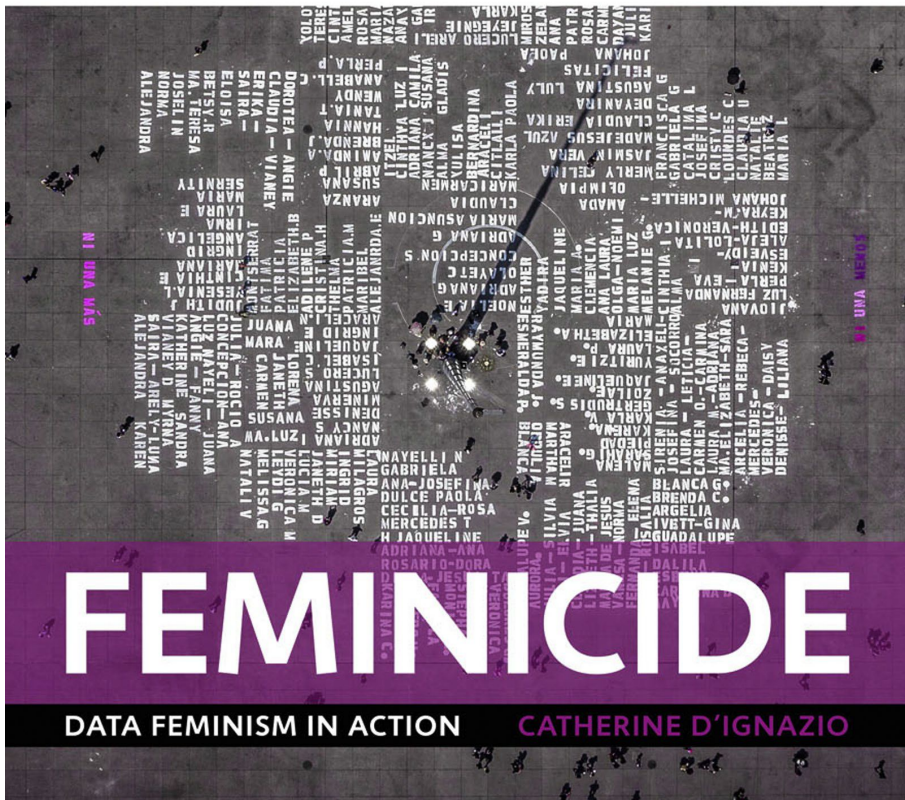

But even prior to that, an NPR analysis [found](#) at [least](#) four [webpages](#) related [to the bureau's efforts](#) to produce data on people's gender identity and sexual orientation were inaccessible as of Jan. 30, the day after the Office of Personnel Management put out [guidance](#) on how agencies should carry out Trump's [Jan. 20 executive order](#).

who counts?

who is counted?

why?

COUNTING

In *Data Feminism*, Lauren Klein and I frame data about feminicide as *missing data*—data that are neglected by institutions, despite political demands that such data should be collected and made available. Missing data may include data that are entirely absent but also data that are sparse, poorly maintained, infrequently updated, contested, removed, and/or underreported. In the case of feminicide, the state and its institutions systematically ignore the phenomenon, neglect to count cases, and often neglect to conceptualize gender-related violence in such a way that it could even be counted precisely—and thus it does not count. When the state and its institutions fail to collect important information, activists and journalists are increasingly stepping into those data gaps and producing their own *counterdata*—data that are produced by civil society groups or individuals to challenge structural inequality, to protest state bias and inaction, to galvanize media and public attention, to work toward policy change, and/or to help heal wounded communities. As Alice Driver notes in the case of Mexico, “The most accurate records of feminicide are still kept by individuals, researchers, and journalists, rather than by the police or a state or federal institution.”⁶ This is true for Mexico, and it also applies to countries in the Global North such as the United States and Canada that keep no records of feminicide because, in contrast to the vast majority of Latin American countries, they have no legal formulation of the concept (see table 1.1).

COUNTING

menting and aggregating and naming is a way of transforming the phenomena that are being measured from discrete, individual events into stable and solid examples of a widespread pattern. Or, as Kathleen Pine and Max Liboiron state succinctly, “measurements make things.”¹⁸ Scholars have described how technical artifacts like databases have a performative power to shape the ways that we see the world, which Lauren Klein and I discuss in chapter 4 of *Data Feminism*. For example, journalist Jonathan Stray discusses how the US census brought into being the category of “Hispanic” in 1980.¹⁹ This is not to say people who spoke Spanish or immigrated to the United States from Latin America did not exist prior to that point, but there had not previously been a state classification of that social phenomenon as an ethnic identity category.²⁰ Once social concepts are named and measured, they may scale and circulate, and, when recognized

Virginia Community Flood Preparedness Fund Grant

The Virginia Community Flood Preparedness Fund (CFPF) was established in the Code of Virginia pursuant to Chapter 13, Title 10.1, Article 4, Section 10.1-603.24 and Section 10.1-603-25 and the provisions of § 10.1-1330. Clean Energy and Community Flood Preparedness Fund, which was passed during the 2020 session of the General Assembly.
