

final project kickoff

foundations of geospatial analysis

2026.10.14

reminders

- FCA next Monday
- sign up for final project meetings with me!
- sign up to print your posters
- curation group presentations next Wednesday

midterm

- come get them at end of class
- great work overall
- average ~81.5 across both sections
- one metric among many for your performance in class
- talk to me if you are worried about overall grade
- talk to me if you are confused about items from midterm

final project overview

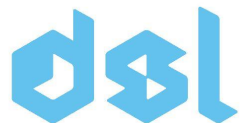

- [overview](#)
- [pitch](#)

some initial brainstorming (5 mins)

either by free writing or replicating the table to the right, spend a few minutes brainstorming across the four “registers”. consider:

- what are you curious about?
- what questions could you ask of data?
- what are your professional interests?
- what kinds of research do you enjoy?
- what topics would you be excited to map?
- what was your favorite lab?
- how do you like to design?

<u>conceptual register</u>	<u>topical register</u>
<u>technical register</u>	<u>graphical register</u>
